LG Dehumidifier - The Garden Hose Drainage Method Setup - LG Dehumidifier - The Garden Hose
Drainage Method Setup by LG USA 125,343 views 5 years ago 3 minutes, 24 seconds - For Model:
UD501KOJ5 Follow the **instructions**, in this video to properly set up and install your **LG**, dehumidifier
using the garden ...

When the water bucket is full, the Bucket Full indicator light will illuminate and a notification tone will
sound.

In this video, we'll cover how to set up your unit for continuous gravity flow drainage using a garden hose.
Also known as the garden hose method.

The garden hose will need to be purchased separately at your local home improvement store.

Make sure to purchase one that is long enough to reach your floor drain from wherever you place the
dehumidifier.

Make sure it comes with the garden hose gasket seal seated properly inside. An improper seal may cause
leakage.

Turn the hose cover at the back of the unit counterclockwise to open it and reveal the discharge outlet.

Remove the water bucket to check the fitting of the adapter as you set it in place

Insert the provided garden hose drainage adaptor into the opening.

Turn the adaptor clockwise until it snaps into place and to align the screw holes.

Insert the provided screw to secure the adapter in place and tighten firmly.

Firmly attach the garden hose to the adapter and hand tighten.

Make an additional 1/8 turn with pliers. Do not overtighten.

Place the end of the garden hose in a floor drain or sump pump pit.

The hose should always be lower than the dehumidifier, and the hose itself should not have any kinks, loops,
or sections that...

Secure the hose in place to prevent it from coming out.

For floor drains, secure using a wire tie or zip tie.

For a sump pit, secure to a discharge pipe.

Make sure the water bucket is installed in the dehumidifier.

Plug the dehumidifier into a dedicated power outlet.

Press the power button to turn the dehumidifier on.

The LG dehumidifier will now continuously drain through the garden hose to your designated drain location.

Periodically check for any leaks at the garden hose connections, or water leaking into the bucket to ensure that all the connections are tightly secured.

How do you fix a dehumidifier that is not collecting water? - How do you fix a dehumidifier that is not collecting water? by Dehumidifier Depot 100,052 views 2 years ago 25 seconds - How do you fix a dehumidifier that is not collecting water? A dehumidifier not collecting water is likely the result of bad drainage.
